**Phone Message No.: 208 – Hydrant Flushing & Valve Exercise Project – May 23 & 24**

This is a call from the Manheim Area Water and Sewer Authority.

Please listen to the following announcement regarding your service.

The Authority will be flushing hydrants on Wednesday and Thursday May 23 and 24. The project will beginning on May 23 from 8AM to Midnight, and will continue on May 24.

Hydrant flushing is a required maintenance procedure to assure public safety, regulatory compliance, and optimal water quality.

Hydrant flushing and valve exercising may cause low pressure. It may also cause discoloration of water than can affect your laundry. If you experience discolored water, please run cold water from one side of the home until the water is clear. This process may take several minutes.

Water discoloration caused by flushing is not hazardous, and safe to drink; however, it is not recommended that laundry be done during flushing. If you must do laundry during the few hours we are flushing, please do not use chlorine bleach.

If particles persist, or if you have other questions pertaining to this project, please contact our office at 717-665-2737. We will try to post status updates on our Facebook, Twitter, and Google Plus pages.

During this project we ask that you please observe traffic caution for the safety of our crew.

If you have missed all or part of this message, you will be prompted at the end to repeat it. Thank you for your patience and cooperation as we work to assure the safety and functionality of your system.
